

Precision is our principle

Swiss made quality
for your specification

Welcome to Paoluzzo AG

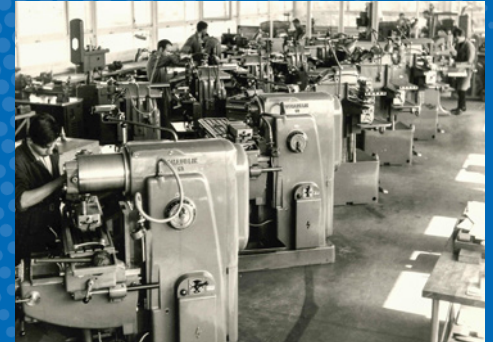

Our services

- Programming
- Assembly
- Quality assurance
- Milling
- Turning
- Grinding
- EDM
- Series production

Focus industries

- Medical technology
- Watch industry
- Aviation
- Mechanical engineering

Paoluzzo AG provides comprehensive expertise in the field of precision machining for your high-end products. A dedicated team of specialists, state-of-the-art machinery, streamlined, automated workflows and the latest software ensure the highest Swiss quality and adherence to deadlines. Our key strengths are 5-axis CNC milling, hard milling, wire and die-sinking EDM as well as CNC turning and grinding. Paoluzzo AG machines various metals such as tool steel, stainless steel, non-ferrous metal, titanium alloys and various special materials. From the creation of prototypes to series production, we plan and manufacture com-

plex mechanical products and assemblies, especially for med-tech industry, watch-making industry, aviation and mechanical engineering.

Founded in 1946 by Rino Paoluzzo in Biel as a 3-man production company for precision tools, Paoluzzo AG today is a state-of-the-art, highly automated high-tech provider. The company has been located in Ipsach since 2019 on over 2000 m² of production space. We have always focused on employee qualifications and have been training apprentices in the field of mechanics for over 40 years.

Because we all need a shoulder to lean on

Paoluzzo AG for medical milled parts

Our product range for med-tech industry

- Implants
- Instruments
- Medical aids
- ISO 13485 certification

Because compromise is not an option

Micro-precision milled parts from Paoluzzo AG

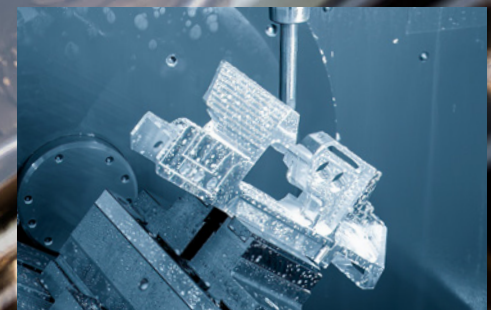

Our product range for the watch-making industry

- Components for watch movements
- Bridges
- Plates
- Cases
- Precision tools

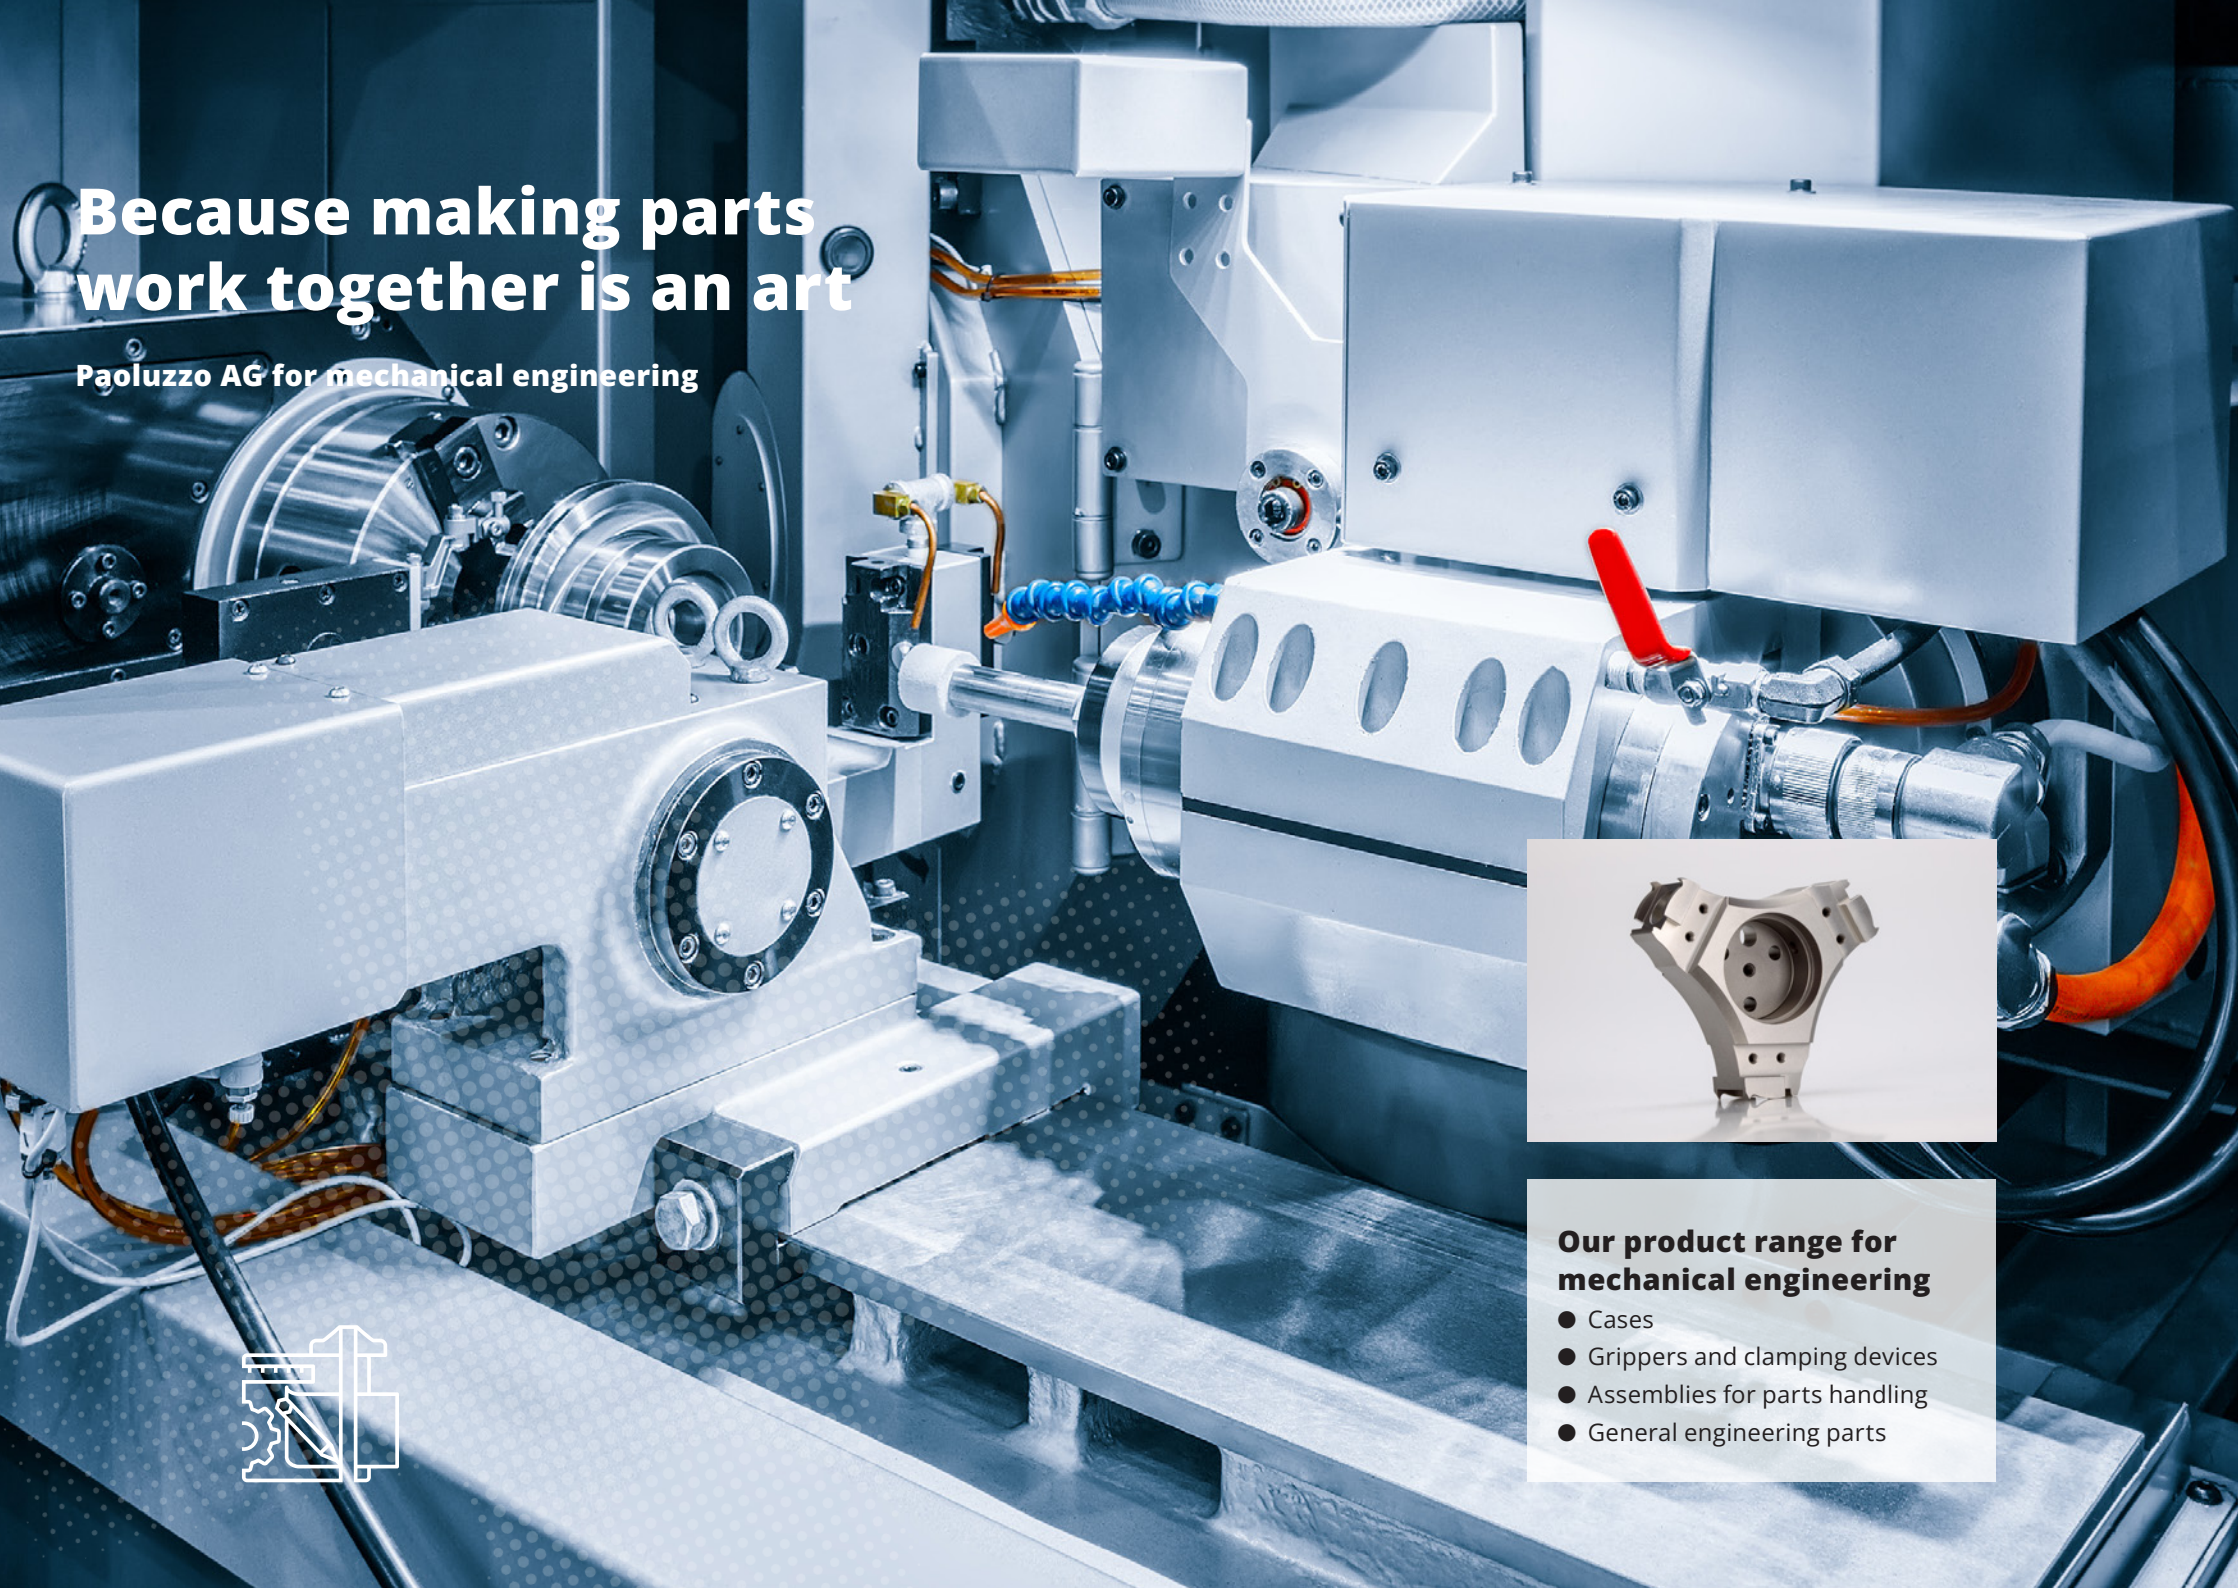

Because safety comes first

Milled parts for the aviation industry from Paoluzzo AG

Our product range for the aviation industry

- Complex housings and engine parts made of high-strength aluminium, titanium or special materials
- EN 9100 certification

Because making parts work together is an art

Paoluzzo AG for mechanical engineering

Our product range for mechanical engineering

- Cases
- Grippers and clamping devices
- Assemblies for parts handling
- General engineering parts

Paoluzzo AG offers manufacturing solutions to meet any challenge.

Certified according to

- ISO 13485:2016 (medical technology)
- EN 9100:2018 (aviation, space, and defence)
- ISO 9001:2015

We look forward to hearing from you.
