

# Co-creative and strong in implementation

We are thinkers and doers, a team of engineers, designers, innovators and manufacturers.

Together with our customers and partners, we develop new products, optimise and industrialise in order to contribute to a positive future.

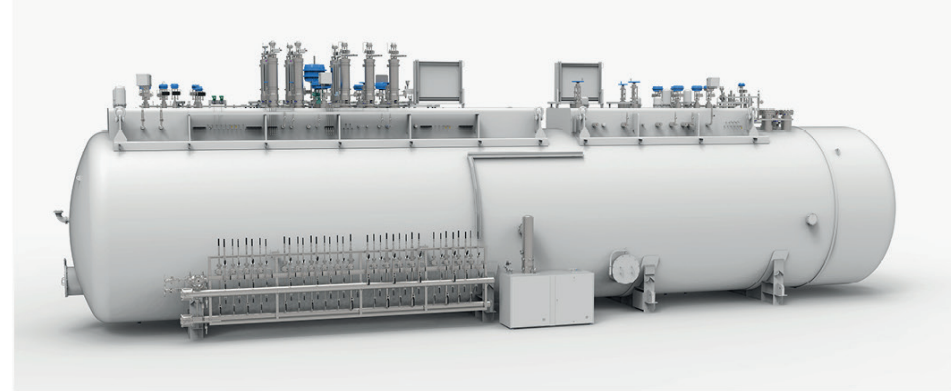

# Our References

We have 20 years of experience in a wide range of industries.

We are big enough to manage complex projects. But small enough to flexibly adapt our services and competences to the project requirements and to act in a very personal way.

# Including the implementation

With our sister company, August Manser AG, we are your strong partner for complete technical solutions, from development and precision manufacturing to the assembly of mechanical or mechatronic assemblies or systems.

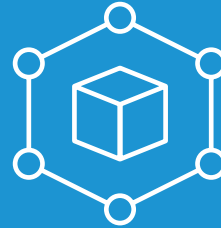

# OUR SERVICES

## Innovation & Product development

We support you from the vision to the industrialised product, including the associated digital solutions and services.

## Product & Production optimisation

We guarantee systematic optimisation with value engineering and competent implementation.

## Flexible technical support

Our qualified employees will be happy to work for the success of your project.

# Why with Sedax

Our interdisciplinary teams are characterised by their experimentation skills. We open up thought patterns, create space for new things and pursue extraordinary paths.

We combine creativity with implementation skills for your market success.

# Thank you

We would be pleased  
to welcome you in  
Uster to show you  
more of our work.
